## Local and General.

Mrs. Sid Jones has returned home  
after an extended visit in England.

Mr. and Mrs. O. E. Jones were  
Olds visitors Sunday.

Mr. and Mrs. Geo. Jones were  
Calgary visitors Monday.

Miss Helen Fleming leaves this  
week for Three Hills, where she has  
accepted a position.

Miss Alma Gordon, of Calgary,  
was a weekend visitor at her home  
here.

Jimmie Stevens and Gordon  
Reeves were Calgary visitors Sat-  
urday last.

F. Demers, who has visited with  
his father, J. Demers, and other  
relatives and friends in the district,  
left Tuesday for his home in Victoria.

Post Office tickets will be open  
one hour, between 10 and 11 a.m.  
only, on Thanksgiving Day, Mon-  
day, October 10th.

Remember the Local Girls' Soft-  
ball Club Balloon Dance to be held  
at Crossfield East Community hall  
on Friday, October 7th.

The Dog Pound Ladies will hold  
their Annual Fowl Supper and  
Dance on Wednesday, October 26th  
in the New Dog Pound Community  
Hall. Bigger and Better than  
ever.

The Madden Ladies Club will  
hold their Annual Fowl Supper  
and entertainment on Friday,  
October 14th, in the Beaver Dam  
Hall. An enjoyable time is  
assured.

Remember the dates of the United  
Church Anniversary service,  
October 16th. Rev. D. H. Teller  
M.A., B.D. of Wesley Church,  
Calgary General Council of the  
United Church, in Toronto will be  
the preacher; also mark the hour,  
3 p.m.

## Stores Close Monday, Thanksgiving Day

Monday next, October 10th,  
being Thanksgiving Day, the local  
stores will remain closed.

### New Telephones Installed.

We are informed that a number  
of new telephones have been instal-  
led recently through the district by  
the Crossfield Mutual Telephone  
Company, and with further pros-  
pects of more citizens of the com-  
munity having telephones connected  
before freeze up.

### Grateful.

The Village Council and the  
Merchants of Crossfield are grateful  
to the Calgary Power Company for  
the co-operation extended, then by  
furnishing power for the coloured  
lights during the two shopping days

## To Shareholders Of Crossfield Mutual Telephone Company

The Board of Directors of the  
Crossfield Mutual Telephone Com-  
pany would appreciate settlement  
of all outstanding accounts by  
October 15th.

F. LAUT, President

### Queen of Hades Gives Tea.

When black cats howl and witches  
wail,  
And goblins prowl in every dale-  
When spectres rise and banshees  
keen.

To solemnize the Hallowe'en,  
Then come, ye shades of men and  
ladies:

The Queen now summons you to  
Hades!

The Akita Group of the C.G.I.T.  
invite their friends to Hallowe'en  
tea, to be held on Saturday, October  
29, from 3 to 6 p.m. and from 7 to  
9 p.m. at the home of Wilda Laut.

## HOME MEAT MARKET & GROCETERIA

WESTERN PLUM JAM

4 lbs. 37c

MANITOBA HONEY, No. 1

10 lbs., white 90c

STRAWBERRY & APPLE JAM

mixed 39c

QUAKER CORN FLAKES

2 pkgs. for 15c

6-lb. SQUARE BACON

per lb. 25c

BURN'S PICNIC STYLE HAM

special, lb. 19c

PURE LARD, lb. 13c

Messrs. A. G. Harnack, and J.  
D. Lossgren, of Oregon, returned  
home safe after a week's vacation  
with the former's son, east of town.  
They report that the crops in the  
district are wonderful and were well  
pleased with the climate and enjoyed  
their stay here.

At the United Church Young  
People's Community Service to be  
held at 7:30 p.m. October 16th,  
Miss Audrey Freeze of Calgary, will  
give a report of the Canadian  
Youth Congress held at Whistler  
last June. All friends are invited to  
this service, in which a large  
number of young people will take  
part. There will be a heavy sing-  
song and good fellowship through-  
out.

## President of Board of Trade Reviews Work

To many of our citizens it may  
appear that the Local Board of  
Trade has not been as active in  
1938 as in previous years.

It may be the cause of a lack of  
enthusiasm or the indifference  
shown by many of the citizens in  
the welfare of the community at  
large. It may be timely to draw their  
attention through the medium of  
this paper, during the week of the  
two Shopping Days Sale of the  
local merchants.

Although there have not been  
many meetings of our local Board  
held this year, the committees of  
the Board have been the means of  
further progress for the benefit of  
the community, and a short resume  
of what has been done may not be  
amiss:

First: The Public Affairs Com-  
mittee have been the means of a  
start being made in beautifying the  
plot of land located in the centre  
of the Village and leased from the  
C.P.R. by the Village Council.

Secondly: This same committee  
were instrumental in getting the  
Rosebud and Beaver Dam Municipal  
Councils together to meet Mr.  
King, the member of the  
Cochrane Constituency, and dis-  
cuss the gravelling of the road  
between Madden and Crossfield.

Although no support has been given  
by the Department of Public Works  
at Edmonton for this work, the  
Beaver Dam Municipal Council  
followed up in gravelling two miles  
of this road, and there is no reason  
why this road should not be gravel-  
led the whole distance next year  
through the co-operation of the  
two Municipalities.

Thirdly: The  
fence surrounding the park has  
also been completed, for which the  
local Board is to be congratulated.

The Agricultural committee has  
also been active. Early in the year  
they dealt with the matter of a  
Junior Grain Club being formed,  
and which is expected to be organized  
for the coming year.

Then again, an agricultural Field  
Day was held at the Olds Agricul-  
tural School in July, which was not  
only a success, but enjoyed by all  
those who participated in the event.  
This committee also realizing the  
serious situation of the Grain Mar-  
ket, like many other similar organi-  
zations, sent a telegram to the  
Minister of Trade and Commerce,  
at Ottawa, petitioning that the price  
of wheat be pegged at 87-1-2 cents.

The Retail Merchants committee  
have been alive to the interests of  
the merchants of the town during  
the year. They are the means of  
this attractive two-days shopping  
sale in Crossfield for the second  
consecutive year, and it is to be  
hoped the citizens of the commu-  
nity will show appreciation of their  
efforts.

The Sports committee cannot be  
praised too much for their splendid  
team work in making the Sports  
Day on July 1st a success, both finan-  
cially and otherwise.

The Entertainment committee  
must not be overlooked, as they, in  
a large measure, assisted in making  
the last Dominion Day a happy  
community event. Much credit is  
due this committee, as they have  
on many occasions assisted in help-  
ing to ensure the Sports Day being  
a financial success. Furthermore,  
they have engaged the Trainor's  
Orchestra for dances to be held  
during the coming winter months.

The Membership committee is  
the weakest on the local Board;  
which is unfortunate, as we need more  
members to assist in furthering the  
interests of the Crossfield district.

It should not be overlooked that  
every individual in the commu-  
nity cannot do better to further  
his own interests than in working  
for the betterment of the commu-  
nity in which he lives.

In conclusion, I would remind  
my fellow citizens that we live in  
an Agricultural district of which  
we may feel justly proud, and with  
the result of another good harvest,  
let us look on life with that broad-  
view of good fellowship as we go  
through our daily tasks throughout  
the year.

T. TREDAWAY, President.

## Game Hunting.

The Antelope hunting season is  
from October 10 to October 29 this  
year and the fee has been reduced  
\$2.00, which makes it only \$3.00.

### Goozles.

Jim Cumming says he doesn't like  
to quarrel.

We wonder who Laughin' Dick's  
lady friend is.

More rain, more rest for the  
threshers in the west.

Ed. Meyers reducing the traffic  
in front of the Chronicle Office.

Someone said that the streets are  
lit up this week.

Warren Hall with his Model T  
all covered with mud. Wonder  
where he has been.

Chuck says she's got a nice Sport  
roadster. Boy!

Margaret Cameron calling at the  
Chronicle Office to read the Carstairs  
Newspaper. That's advertising!

Mr. Gish, wondering where his  
Biology equipment has gone to. He  
is unable to do the Big Apple.

## Correction.

On the front page of last week's  
edition of the Chronicle, in the list  
of Merchants and Donors of the  
annual shopping number, we design-  
ated Deliveries Limited as Calgary  
Breweries. This should have read:  
"Agents for the Alberta Breweries".  
Then we had a line, "Insurance  
and Real Estate". This failed to  
have the agent's T. Tredaway in it.  
We sincerely regret these errors,  
which we are endeavouring to rec-  
tify through our columns.

## With the C.D.S.

The general meeting of the Cross-  
field Dramatic Society will be held  
tonight (Thursday), at 8 o'clock in  
C.D.S. dramatic rooms, above Bal-  
lams Store.

All those interested and those  
wishing to join this society are  
earnestly requested to attend this  
meeting so that the society can get  
organized for the winter months.

A full programme of special in-  
terest has been prepared, and it is  
important that you turn out.

## YOUR COUNTRY NEEDS YOU

Perhaps you shrink from these words; and who can  
blame you? They recall all too vividly the patriotic fervor  
of a nation in arms and the epilogue of horror and heart-  
break. But, although the call is more urgent for your help  
in a crisis, your country needs you just as surely in the cause  
of peace and progress. If you and your neighbors are  
prosperous, your country prospers. If you and your neighbors  
are well informed and progressive, the whole country  
reaps the benefit.

Greater progress, higher standards of living, better ways  
of life, are possible to an informed people. It is your privi-  
lege to be informed fully on all matters of importance  
through a free press. Make full use of this freedom, denied  
in so many other countries. Be informed. Keep a voice in  
your own government.

## Another Dragon To Slay

It would be difficult to conceive of a more worthy movement of a humanitarian character than the drive which is now being launched across the Dominion to make a co-ordinated and well directed attack on one of the greatest scourges to which human flesh is heir—cancer.

The fact that to date medical science has been unable to ascertain the cause of cancer or to find a specific cure, once an advanced stage of the disease has been reached, should not dispose people to throw up their hands and admit defeat, but, on the contrary this, coupled with the further fact that the disease is on the increase, should act as a stimulant to the efforts which are now being instituted, first to mitigate the extent and severity of this menace and later, perhaps, to ensure its eradication.

### Public Aid Needed

Eminent medical authorities, who have just completed a mission tour across Canada in an effort to enlist public support for an organized campaign against this dread disease, freely admit that the medical profession can do nothing more than it is now doing in its attempt to reduce the incidence and death toll from cancer without public support.

In other words, it is made quite clear that unless people who have cause to suspect or fear cancerous infection of their bodies, visit their doctors on the first breath of suspicion and thus ensure early diagnosis, there is no possibility of further reducing human suffering and loss of life from this cause, at any rate until such time as its cause and cure may be discovered in the laboratory, or elsewhere.

This, of course necessitates general public knowledge of symptoms which may or may not indicate the onslaught of cancer in its earliest stages. In view of the insidious nature of the disease, this knowledge is the most valuable ammunition which can be used in the battle against cancer at the present stage of medical research and must remain so until science itself reveals some of the mysteries surrounding its cause and cure.

### Public Enemy No. 2

The facts show that in this country cancer ranks second to heart disease as the greatest killer of mankind. Last year between 11,000 and 12,000 residents of this Dominion died from cancer and next year the disease will send as many or more to an untimely grave, unless the public take the necessary precautions to reduce the toll.

That it is not difficult to take out at least a partial insurance policy against death from cancer is quite evident when the list of conditions which may indicate cancer in its early stages, as outlined by these authorities are known and heeded. They are: a cracked lip which won't heal; a sore tongue which continues to be sore; a hardness or lump in the breast which gives no pain; a hoarseness of the voice which persists past the duration of a common cold; difficulty in swallowing food; symptoms of vague indigestion on the part of those who thought they had a cast iron stomach; a wart or mole which for no particular reason begins to grow rapidly; an unnatural and persistent bleeding from any orifice of the body or a comparatively sudden alteration, in any manner, of usual bowel evacuation habit.

"If you have discovered any of these signs and symptoms," according to Dr. A. T. Bazin of Montreal, Professor of Surgery at McGill University, "the chances are three to one against cancer, but on the other hand the chances are one in four that early cancer is the cause."

If this information means anything at all, it indicates the immediate necessity of the person noting any one of these suspicious conditions immediately consulting his or her physician and then as Dr. Bazin says: "the problem is then his, also the responsibility, unless you refuse to accept his advice."

### A Delayed Campaign

In the light of the unchallenged statement that a large percentage of cancer victims do not present themselves to their medical advisers until they have passed the stage where a cure might be effected, the value of the information now being given by the public through the efforts of the Canadian Medical Association and the Canadian Society for the Control of Cancer can readily be understood. The pity of it is that this campaign has not been initiated earlier in Canada as it has been in some other countries. Many lives now lost might have been saved.

Taking into consideration the nature of the disease, its growing incidence and the urgent necessity for public enlightenment if its toll is to be curtailed, the argument that the medical profession may frighten the people to death by giving the information necessary for their protection is entirely specious. Lord Moynihan of Leeds and London, England, one of the greatest of British surgeons who instituted a similar campaign in the Old Land is quoted to have met this charge by stating: "I am frightening them to life." As Dr. Bazin states: "Many people have died from cancer. No one has died from fear of cancer."

### Will Continue Research

Professor Freund, Formerly of Vienna, Working in London

In London is Professor Ernst Freund, 74-year-old Viennese medical expert, who has worked for over 50 years on cancer research. He is now to continue his work in a specially-built laboratory in London, reports the London Daily Sketch. The American millionaire diplomat, Frederick Pearson, will finance the installation of a special research laboratory as an annex to the West London hospital. Arrangements will be concluded now that members of the hospital board, who have been on holiday, have returned to London. Professor Freund is in London with his assistant, Frau Dr. Kammer, who has helped him in his work for over 20 years in Vienna, where she was second in command at the Pearson Research Institute, now to be transferred to London.

Still, if you haven't the right to enter a stranger's home by the door, what right have you to enter by the telephone?

Government statistics show that the average family in Australia eats 1,172 kinds of food.

## TAKE THE LEAD OUT OF YOUR LEGS

Get Organ in Your Blood and You'll Get the Pay that Sends You Bouncing Up the Stairs.

People who smother to death die because oxygen has been cut off from their blood. That's why you are slowly smothering if your blood is loaded with lead. Lead compounds are your oxygen-murderers. They carry the oxygen, your blood, into every part of your system. Without enough oxygen-carrying corpuscles, your blood is like stale, flat, lousy, effluent water. Your stomach and bowels slow down. Your skin gets pale, lousy, effluent. You feel depressed.

What you need is Dr. Williams' Pink Pills. These little pills help you get more and better red corpuscles and thus increase the oxygen-carrying power of your blood. Dr. Williams' Pink Pills today at your drug store and see for yourself how the time-proven blood-builder will help give you back more life and vigor.

### Menu Cards Were Popular

Guest At Royal Luncheon In Versailles Wanted Extra Copy

The menu for the state luncheon at Versailles this summer, honoring the British King and Queen, was printed on cream paper in the style of the type found in the editions of Voltaire. So popular were the menu cards that one guest was heard to order 42 for an extra copy to take back to his family. Each guest received a reproduction in bronze of the famous medal struck by Louis XIV, to commemorate the completion of the chateau in 1687. The King and Queen received similar medals in gold.

### Earnings Of The Quints

Audit Of Their Finances Shows Amount Is \$800,000

The Dionne Quintuplets have earned \$800,000 since their birth four years ago last May 28. It was revealed recently in audited statement of their finances. The statement was made by Percy D. Wilson, Ottawa, one of their guardians, and Keith Munro, their business manager, at a meeting of the board of guardians at North Bay, Ont.

### Hardship Persists

Many folks now have electric clocks and are relieved of the hardships of our forefathers who had to wind the time-piece nightly. However, no mechanical gadget yet has done away with the necessity of putting out the cat.

A lightweight, collapsible, portable case designed for convenience on the roof of an automobile has recently been patented. It is reported that the house will sell for less than \$100.

Perhaps you know that Italy has a king. But he is not working at the job.

A good deal of horse sense went with the horse. 2275

## "LIGHT UP WITH OGDEN'S"

You'll be with delight at the friendly flavor of this grand-tasting cigarette tobacco. Ogden's Fine Cut is the most enjoyable smoking for roll-your-owners everywhere. Why not learn for yourself how Ogden's stands high above them all when it comes to giving satisfaction? Get a package today—choose the best papers—Vogue or "Chanticleer"—and light up for extra smoking pleasure!

### Had Equal Right

Quick-Witted British Surgeon Had Prussian Officer Stumped

It is said that the face of Sir Louis Grieg seems always on the verge of laughter. King George V. once remarked that the company of Sir Louis was like a bracing tonic. Sir Louis and the present King were boyhood friends. They were together in the training ship Cumberland. Later Sir Louis became the Duke of York's equerry. He has been a sportsman all his life. As a youth he captained the Scottish international football team four times. In tennis he and the Duke of York won the Wimbledon in the Air Force. He served overseas as a naval surgeon. After the fall of Antwerp he was captured when he stayed behind to tend the wounded. A typical Prussian officer demanded of him: "What are you doing in Belgium?" Quick-witted Sir Louis replied: "If it came to that, what are you doing in Belgium?" The Prussian was stumped.

## SELECTED RECIPES

### CHOCOLATE FUDGE

3 cups white sugar  
1/2 cup Bee Hive Golden Corn Syrup  
1/2 cup milk, evaporated  
1/2 cup water  
2 tablespoons butter  
2 squares cooking chocolate  
1 teaspoon vanilla  
1/2 teaspoon salt

Melt butter and chocolate slowly together. Add all other ingredients except vanilla and boil until it forms a firm ball in cold water, stirring occasionally to prevent burning. Remove from fire and let stand until lukewarm. Add vanilla and beat until it gets heavy, when immediately turn it out on buttered tin. Nuts, cherries or raisins may be added while beating.

### DIVINITY FUDGE

1/2 cup Bee Hive White Corn Syrup  
1/2 cup cold water  
2 cups white sugar  
2 egg whites  
1 teaspoon vanilla  
Few grains salt

Cook syrup, water and sugar together until it forms a firm ball in cold water. Beat egg whites with salt until stiff, and gradually add hot syrup. Add vanilla and beat until thick. Variations: Broken walnuts, dry cherries, chopped candied ginger, etc. Turn on buttered pan.

### Here's A Suggestion

How To Keep Roosters From Crowing Early In Morning

Pueblo police urged local poultry growers to follow the suggestion offered by Laura M. Smith, of Canon City, Colo. for making possible a morning sleep in the vicinity of a chicken ranch. "We rebuilt the hen-roosts and placed them near the ceiling so that when one would raise his head to crow he would bump his head on the ceiling and changed his mind," she explained. "So they never crowed until they were on the ground."

### Changed Very Little

The air pioneer Orville Wright was 67 on Aug. 20. It is 35 years since his famous flight with a heavier-than-air machine, with his late brother. It is said that the control system he invented has changed very little.

In ancient Russia unfaithful wives were buried alive in damp earth and left to die of starvation.

The 20 Latin American countries are estimated to have now over 130,000,000 population.

## Another Canadian First

Canada Ships Canned Tomato Juice To United Kingdom

According to the statistics of the Imperial Economic Committee, Canada leads in shipments of canned tomato juice to the United Kingdom. Arrivals of canned tomato juice at the principal British ports during the four weeks ended July 30, 1938, amounted to 7,087 cases, compared with 5,542 for the preceding four weeks and 12,985 for the four weeks ended July 31, 1937. Canada supplied 4,648 cases, and the United States 2,409.

Imports of tomato juice into the United Kingdom during the first seven months of 1938 totalled 39,468 cases, of which Canada supplied 16,811, the United States 10,942, and other countries 1,915 cases.

## Is Really Important

Writer Tells Some Interesting Facts About Letter "E"

"Someone has decided," says an exchange, "that the letter 'e' is the most unfortunate letter in the alphabet, because it is always out of cash, forever in debt, never out of danger. No little credit is due, however, in that it is never in war, and always in peace. And we are deeply indebted to this little letter, since it is the beginning of existence, the commencement of ease, and the end of trouble. Without it there would be no meat, no life, and no heaven. It is the centre of honesty, and, although it starts off in error, it ends in making love perfect."

## Earth Is To Blame

Changes Rate Of Rotation But Moon Keeps Even Pace

A scientist offered the moon exonerated of a 50-year-old charge of irregularity in its motion. Dr. Ernest W. Brown, professor of astronomy at Yale University, says the earth was to blame all the time. Writing in the annual report of the Smithsonian Institution, Dr. Brown said a check of observations of the sun, moon and earth for the last 150 years disclosed sudden, irregular changes in the rate of the earth's rotation on its axis. Half a century ago, astronomers believed it was the moon's motion which varied.

## FETCHING NEW "DIRNDL" DRESS!

By Anne Adams

"Debonair and individual" is the phrase for this striking new just-frock-and-its-new-shirred-waist-line should make it the favorite of a "state to sixteen" wardrobe! Anne Adams designed Pattern 4930 for growing bones—that's why elastic is such a splendid idea for it! Waist merges into soft "action" gathers. So easily followed is the illustration that a teen-ager could make this frock herself and find it almost as simple to do as a doll's dress. Wear it short or long sleeves for classroom and after-school wear. Perfect in chills or synthetics!

Pattern 4930 is available in girls' and junior sizes 6, 8, 10, 12, 14 and 16. Size 10 takes 2 1/2 yards 36 inch fabric. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly size, name, address and style number and send order to the Anne Adams Patterns Dept., Winnipeg Newsprint Co., 175 McDermott Ave. E., Winnipeg.

## Persia Completes Railroad

Built 866-Mile Line Without Any Outside Financial Help

By completing the railroad from Bandar Shah on the Caspian Sea to Bandar Shapur on the Persian Gulf the government of Iran (formerly called Persia) has provided a means of transportation from north to south which is confidently expected not only to promote the development of the country but greatly to improve its means of defense. The road is 866 miles in length, in the south crossing the Luristan Mountains at a height of more than 7,000 feet and in the north rising almost to the same height in the Elburz Mountains.

Work on the line was begun seven years ago, and the section from the Caspian coast to Teheran, the capital, was opened by the Shah on February 19, 1937. It was supposed that the line would not be opened from sea to gulf until next year, but the constructors appear to have built faster than they expected. The cost of the railroad has been defrayed by Iran without aid from beyond its own borders. This imposed hardships on the country, but it may be repaid for these by the fact that it has no foreign bondholders to consider.

The Shah went by train to Saad Cheshmeh, 20 miles south of Teheran, on August 28, and himself completed the line, a brilliant assembly being present at the ceremony. Throughout the country as well as along the route the meeting of the rails was celebrated and Teheran was decked with flags.—New York Sun.

## ARMS USELESS ON A WET DAY

Rheumatic Pains Relieved By Kruschen

Here is a noteworthy instance of the manner in which damp weather can affect the joints of one who is subject to rheumatic pains. "I had been suffering from rheumatism very badly," a man writes, "and had such pains in my joints that I could hardly bear it, on a wet day especially. It pained me terribly to use my arms, and I was hardly able to work. I tried two different remedies, but I was still bad after the treatment."

"Then I was told to try Kruschen Salts, which quickly brought relief. So of course I have kept on with it, and I am now much better and have never felt so fit for years. I used to feel so miserable and sluggish, but now it is a pleasure to be able to work."—S.E.

The pains and stiffness of rheumatism are often caused by uric acid crystals in the muscles and joints. The numerous salts in Kruschen assist in stimulating the internal organs, healthy regular activity, and help them to eliminate excess uric acid.

### Many Things Happened

Excitement Crowded Into Five Minutes When Wine Cask Exploded

Explosion of a wine cask in the basement of a distributing company in Chicago, Illinois, caused the injury of one workman; the splashing of 1,650 gallons of port all over the cellar; tripping of the sprinkler system which flooded the plant and turned in a fire alarm; collapse of a firebrick wall and the shattering of plate glass windows—all within five minutes.

### Listed As Outstanding

Charlie McCarthy has talked Edgar Bergen into something like a "Who's Who in America." "Ventriloquist Bergen is one of 2,545 newsmen among the 31,545 outstanding contemporary men and women whose biographies are included in the 50th anniversary edition.

Petroleum was used centuries before the Christian era.

## Tragic Story

History Of The Colonization Of Greenland By Icelanders

Probably not in the history of colonial development is there a more tragic story than that of the colonization of Greenland by Icelanders nearly 1,000 years ago. The Danish government and its researchers have laid bare the whole gruesome tale of a 500 year effort that ended in the death of a population estimated at between 3,000 and 5,000. The world hardly realizes that Norway had actual control of the Greenland colony since 1261, and that it was sheer neglect which spelled the doom of its sons across the Atlantic.

Will the now available story of the Norse settlement in Greenland help in throwing some light on the "white" Indians of James Bay, and help also to establish the identity of the Europeans who discovered America?

Surely men who sailed across 2,000 miles of Arctic sea without compass or chart would not be deterred from crossing the short distance from the Norse settlements to the nearby mainland.

Can it be assumed that Norsemen in Greenland would fall in 500 years to explore their own immediate western neighborhood when it is known they explored far north in the Arctic seas?

Is it probable that one single small ship would carry enough men to so modify a James Bay tribe of Indians as to give it numerous members who would be taken for Indians if they were white men's clothes?

Was there an effort of many members of the dying colony in Greenland to find a more fertile land? Or are the "white" Indians the descendants of sailors from Norway who were wrecked in James Bay?—J. W. Curran in Sault Ste.

## A Wise Decision

Court Allows Young Stowaway To Enroll In Marine School

Bobby Stap, New York, hero of two trans-Atlantic and two coast-wise stowaway trips this summer, has enrolled in the New York Merchant Marine School from which he hopes to graduate in eight months as a full-fledged cabin boy, ready and eager for the seven seas. The 13-year-old ocean hobo told the Children's Court, to which he had been committed for his waywardness, "I love the sea and I want to be on it."

The battle of Lookout Mountain, fought during the Civil War, was called "the battle above the clouds."

Like human beings, gorillas normally are right-handed.

## MUSSOLINI SAID TO HAVE BEEN FACTOR IN PEACE

Munich.—Premier Mussolini was credited in inner conference circles with having weighed the balance toward peace in an 82-minute visit with Hitler just before the four-power conversations opened.

The two met at Kufstein, on the former Austro-German border, and came on to Munich together by train. They had full opportunity to talk things over before their meeting with Chamberlain and Daladier.

On the train ride, Mussolini was said to have stressed the necessity of reaching an agreement with France and Britain. This was said to have paved the way for a quick accord of all four statesmen.

That Mussolini should seek to restrain Hitler after his own series of speeches in northern Italy during the past two weeks came as a surprise to some. During the speech-making tour, Il Duce had asserted and reasserted that Czechoslovakia should be chopped up.

This explanation was offered in informed quarters:

At first Mussolini did not believe Hitler was in earnest in his threat to invade Czechoslovakia. Il Duce was under that impression when he made his speeches in northern Italy.

Neither did the Italian premier believe that France and Britain would fight. Even after the Berchtesgaden conference between Hitler and Mr. Chamberlain, Il Duce had continued to berate democracies as "cowards."

But within 24 hours before the Munich meeting was called Mussolini was said to have become alarmed, convinced that Britain and France really would fight if Czechoslovakia were invaded.

The French had started progressive mobilization and Britain had mobilized her navy. Thus, Il Duce was ready to accept Mr. Chamberlain's proposal of intervention at Berlin when it was made by the Earl of Perth in Rome. This proposal was said to have been that Mussolini back up the idea of a four-power get-together.

A prominent Nazi editor said the conference marked a change of Hitler's attitude toward democracies.

This source said the Fuehrer had found in Mr. Chamberlain and Premier Daladier two men whom he could not but respect.

Chamberlain's services already had won a public tribute from Hitler in his Sportsplatz speech in Berlin. But, the editor said, Hitler did not have the measure of the French premier until Thursday.

The Fuehrer was reported to have labelled the stocky Frenchman "ein ganzer kerl" (a real he-man). The German delegation was thoroughly convinced Daladier was one of the most determined champions of peaceful settlement.

## Many Poles Killed

Border Incidents Said To Have Caused Death Of 70

Warsaw.—Official Polish figures placed at 70 the number of Poles killed in incidents on the Polish-Czechoslovak border during the recent tension.

The newspaper, *Wieczor Warszawski* alleged a number of deaths were caused by electrified wires strung along the frontier by the Czechoslovaks.

Reports of new frontier incidents asserted shootings occurred, for the most part, at night when Poles attempted to flee from Czechoslovakia into Poland.

The government continued to await a Czechoslovak note answering a Polish note which contained detailed proposals for territorial revision of Teszyn and Silesia to settle the Polish minority question.

## New Canadians

Montreal.—Chief Clerk D. Robitaille of the naturalization court said his staff had to be augmented to handle the rush of German, Czechoslovakian, Hungarian, Austrian and Italian applicants for Canadian citizenship. Applications have increased 50 per cent, he said, as foreigners sought to swear allegiance to the British Empire to escape conscription calls from their home lands.

## Mobilize Chemists

Ottawa.—Canadian council for the Society of Chemical Industry appointed a two-man committee to confer with chemical organizations in Canada for the mobilization and utilization of chemists in any national emergency. Victor G. Bartrum and Dr. J. C. Phillips, both of Montreal, comprise the committee.

## Bren Gun Probe

Competence Of Department To Pass Upon Commercial Contract

Ottawa.—Competence of national defence department officials to pass upon economic and business aspects of a large commercial contract is one question Mr. Justice H. H. Davis will consider in preparing his report on the new Bren gun contract.

The judge, royal commissioner investigating the contract under which the John Inglis Company of Toronto, is to make 7,000 Bren light machine guns for the department on a cost plus 10 per cent. basis, indicated recently.

He was commenting on questions addressed to Lieut. M. P. Jolley, by Lieut.-Col. George Drew, who provoked the inquiry by criticizing the contract in a magazine article.

Col. Drew had asked Lieut. Jolley if a recommendation contained in a departmental report he had helped prepare to the effect the 10 per cent. profit on machinery installed in the Inglis plant be eliminated had been followed. The witness said it had.

"Have you read the contract?" asked Col. Drew.

At this the commissioner halted the questioning, saying undoubtedly the witness believed the profit had been eliminated and Col. Drew believed it had not. That was a matter for argument and interpretation.

"It is essentially a business proposition," the commissioner said, "and one I will have to deal with in any event, whether this man (Jolley) has any competence to pass on a business proposition."

Col. Drew wanted to know if any part of the gun could not be made by existing Canadian steel and equipment factories and suggested some delicate parts of the gun were farmed out to parts manufacturers.

"Witness said he thought such firms could make the parts provided they had the equipment and had opportunity to experiment or draw on experience of the English plant in England. He said he had made no investigation of the possibility of having parts of the gun made by different manufacturers and assembled."

## Belgian Neutrality

Great Powers Have Guaranteed Belgium's Frontiers

Brussels.—Premier Paul Henri Spaak told parliament an early battle-group of the Great War, that Europe's big powers would observe their guarantees not to invade her.

In a broadcast after the government had called for 270,000 additional soldiers to reinforce the state of peace, the premier said: "The great powers have guaranteed Belgium's frontiers, and all recent information indicates these engagements will be kept. Our territory will not be a battleground of Europe."

## New League Committee

Member Of Tariff Board Has Accepted Chairmanship

Ottawa.—George H. Sedgewick, chairman of the tariff board, has accepted chairmanship of a new committee which the League of Nations Society has established to direct its international affairs literature service. It was announced.

The society announced Hon. H. A. Bruce, former lieutenant-governor of Ontario and Grant Dexter, London correspondent for the *Winnipeg Free Press*, had accepted membership in the society's national executive committee.

## New Bakery Organization

Toronto.—Intercity Western Bakers stockholders have approved formation of a new subsidiary of George Weston Limited to be known as Western's Bread and Cake Company. It was learned here. The new company will take over assets of the Intercity Company, with headquarters in Winnipeg or Regina. Capitalization and new company officials will be decided later this year.

## Would AM Czechs

Montreal.—Many Canadians have volunteered for military service with Czechoslovakia in the event of war. Dr. Frantisek Pavlas, its consul-general, said here. Some of them were well known fliers, he said. Consular officers have taken no action on their applications except to record their names. Dr. Pavlas said.

## Gift For Red Cross

Halifax.—Gift of \$5,000 to be expended by the American Red Cross "in whatever way may be deemed best for New England sufferers" in the by-laws which swept the northeastern United States, was announced by Premier A. L. Macdonald of Nova Scotia.

## Crude Petroleum

Production In Canada Reaches New High During July

Ottawa.—Crude petroleum and natural gasoline production in Canada during July advanced to a new high monthly record of 693,333 barrels from the preceding month's output of 537,694 barrels and the July, 1937, total of 244,931 barrels, according to the Dominion bureau of statistics. Production during the first seven months of 1938 totalled 3,612,757 barrels compared with 1,307,544 barrels in the corresponding period of 1937.

Alberta's output in July of 678,243 barrels included 673,810 barrels from the Turner valley field.

Exports of petroleum and its products from Canada in July were valued at \$110,539, or 25 per cent. below the value of the previous month's exports.

## Transfer To Halifax

Royal Air Force At Trenton May Be Sent To East Coast

Trenton, Ont.—It was reported that officers and men of the No. 6 torpedo bombing squadron of the Royal Canadian Air Force station here expect to be transferred to Halifax for duty shortly. Confirmation of such a transfer was not available.

The squadron is composed of 80 officers and men with six aeroplanes of heavy type. The machines are equipped with two machine guns with torpedo racks for releasing bombs.

It was stated unofficially that leaves have been cancelled at the R.C.A.F. station here.

## DOCTOR MANION TO SEEK SEAT IN LONDON RIDING

Ottawa.—Hon. Dr. Robert J. Manion, Conservative leader, said he was willing to seek a seat in the House of Commons at the London, Ont., federal by-election next Nov. 14.

He issued a statement which said: "I have advised the National Conservative Association of London of my willingness to allow my name to be presented to the convention, shortly to be called to choose a National Conservative candidate. I feel deeply honored that the Conservative association in the splendid riding of London should seek me as their candidate and I assure them of my constant desire to serve them and Canada."

"At the same time, I should like to express my appreciation of the kindness of the Conservative associations of Brandon and Waterloo South, both of which offered me nominations."

Referring to Prime Minister Mackenzie King's announcement following the cabinet session that he would like to see Dr. Manion unopposed in London, the Conservative leader said:

"I wish to express my warm appreciation of the prime minister's courtesy in indicating the government's desire that I should not be opposed in the by-election in London. Such an action is a very happy expression of the amenities of public life in Canada."

## NEW CHIEF OF NAVY TAKES OVER

Admiral Sir Roger Backhouse photographed at his desk as he assumed his duties as First Sea Lord and Chief of Naval Staff.

## TO SERVE IN ONTARIO

A. F. Curran, who has been appointed District Poultry Products Inspector for the Poultry Division, Dominion Department of Agriculture, with jurisdiction throughout Ont., Mr. Curran is a native of Prince Edward Island and has served in a similar capacity in all three of the Maritime Provinces. He will make his headquarters in Toronto.

## Nations Buy Up Food

Russia Only European Country Which Grows Enough For Needs

London.—European nations looked hungrily toward the Americas in a scramble to fill their cupboards for war and prevent the starvation that stalked the last conflict.

With the possible exception of Russia no major European nation grows enough to feed itself.

For the past two years the principal European nations have taken steps to store up for a rainy day. Great Britain is said to have enough food stocks, together with normal production of the British Isles, to feed the country for one year without a single ship coming in.

Britain imports at least 50 per cent. of her beef, mutton and pork and three-fourths of her wheat.

Germany's bumper grain crop, including wheat and other bread grains, is expected to total well over 28,000,000 tons. Field Marshal Herman Goerring, Nazi economic dictator, recently ordered hurried building of more granaries.

Fresh meat is not very plentiful in the Nazi realm since farmers still are suffering effects of the pork crisis which began three years ago, and was asserted, however, with 750,000 head of hogs and 226,000 head of beef on the farms, stored in refrigerators, and canned, Germany could face the future confidently.

Usually well informed sources said Italy has laid by only a comparatively small stock of food. Some purchases of wheat were believed made recently in Argentina. For her meat supply, Italy depends largely on Yugoslavia.

## Italian Troops In Spain

Rome.—A government spokesman characterized as "absolutely unfounded" reports Premier Mussolini had agreed to or ordered the early withdrawal of Italian troops from the Spanish civil war.

## French Forces In Far East

Shanghai.—French authorities moved reinforcements to the French consular defences as concern increased over the European war crisis and its possible repercussions in the Far East.

## Shows Upward Movement

Dominion Bureau Of Statistics Reports Increase In Employment

Ottawa.—Employment at Sept. 1 showed a decidedly upward movement, the expansion exceeding that indicated at Sept. 1 in any previous year of record, the Dominion bureau of statistics reported.

All provinces except New Brunswick shared in the improvement, but the recovery in manufacturing in Ontario and that of a more general character in the prairie provinces were especially important factors in the situation, the bureau said.

The bureau says unusually pronounced expansion was shown in manufacturing, more than 12,000 persons being added to payrolls, largest gain ever recorded in early autumn. The usual gain at Sept. 1 is slight.

Greatest improvement in factory production was in food, textiles, iron and steel, that in iron and steel being contra-seasonal. Mining, transportation, construction and maintenance services and wholesale trade showed heightened activity.

Prairie provinces reported an increase in industrial employment although a total increase of seven per cent. was reported because of the favorable agricultural situation. Gains were shown in manufacturing, mining, transportation services, wholesale trade and construction and maintenance. Retail trade was slacker.

## H.B. Sailings

Steamship Dalby First Vessel To Carry Grain Out Of Port In 1938

Churchill, Man.—The steamship *Dalby* of the Ropner line sailed Sept. 28 to be the first vessel carrying grain out of this Hudson Bay port in 1938.

The freighter, which arrived from Newcastle-on-Tyne, loaded 310,000 bushels of wheat, mostly No. 1 Northern, and sailed for Queenstown for orders.

S.S. *Rudby* docked after running into rough weather off the north end of the British Isles. S.S. *Gulpuist* due this week and these two vessels will complete movement of the 1,300,000 bushels of wheat in store here. Most of the wheat in store was brought from northern Saskatchewan ports.

## JAP REPRISALS IF LEAGUE RESORTS TO SANCTIONS

Tokyo.—Domei, Japanese News Agency, quoted "a semi-official source" as stating Japan would consider taking some action against the foreign consuls and interests in China should the League of Nations impose sanctions against Japan at China's request.

Domei quoted its source as stating: "Japan would find itself obliged to reconsider the present fundamental policy in accordance with which it respects the interests and concessions of foreign powers in China." If the sanctions move were carried through.

The statement followed a report from Geneva that the league council had decided to declare sanctions applicable to Japan in view of refusal to settle its conflict with China under provisions of the league covenant.

Geneva.—League of Nations delegates said the swift progress of China's appeal for punitive measures against Japan put up to individual nations the question of how far they should go in applying anti-Japanese sanctions.

Dr. V. K. Wellington Koo, the Chinese delegate, won an agreement from British and French representatives that league punitive powers were applicable against Japan. Dr. Koo made his appeal the precedent for a possible Czechoslovak appeal against threatened German aggression.

## Unfortunate Mistake

Sandy Affair So Described By Select Committee Of House

London.—A select committee of the House of Commons described the "Sandy affair" as an unfortunate mistake. The committee in its report cleared most of the participants entirely and rebuked others mildly. Duncan Sandys started the storm June 27 with allegations his rights as a member of parliament had been violated by an implied threat of prosecution under the official secrets act. Leslie Hore-Belisha, war secretary, asserted Mr. Sandys was not threatened.

## WHAT CZECHS STATE THEY ARE READY TO CONCEDE

London.—The text of the Czechoslovak legation's statement on the concessions Prague is willing to make follows:

"The Czechoslovak government announces that before the Munich conference, the Czechoslovak government accepted further concessions."

"It is prepared to cede to Germany territory containing more than 50 per cent. of German inhabitants and asks for itself only frontiers of such a kind as to make a new Czechoslovak state capable of existence and defence."

The Czechoslovak government, however, cannot agree to a plebiscite as well in the areas which contain a large Czechoslovak majority or those which are entirely Czechoslovak, as demanded by Germany for military reasons.

The Czechoslovak government agrees to time limits for the final settlement.

All these arrangements are to be carried out by Dec. 15, but a settlement is possible by Oct. 31.

The Czechoslovak government agrees to supervision by an international commission and by the British Legion as well as to occupation by British troops before the territory is handed to the Germans.

It agrees to negotiations regarding demobilization and to the recall of its troops and to the revision of its system of treaties, but in the interests of its own defence and that of the Czechoslovak and democratic German minority and also of the Jews in the territory, it cannot evacuate and demobilize or abandon the fortifications before the demarcation of frontiers has been fixed and an exchange of population guaranteed and a new system of international guarantees has been initiated. It is anxious to expedite these negotiations, and in no case does it wish to delay the final settlement on which, at the advice of Great Britain and France, it is resolved once and for all and for which there have been so many telegraphic appeals from so many heads of states, led by President Roosevelt.

At this critical juncture, the Czechoslovak government is placing the interests of civilization and world peace before the distress of its own people and is resolved to make sacrifices which never in history were asked from an undefeated state with such concentrated effort.

It is, therefore, entitled to demand that the other side should also show an understanding for the peace of Europe and the world.

If in such an advanced state of negotiations insuperable obstacles were to arise, the Czechoslovak government proposes the whole dispute should form the subject of an international conference or should be submitted for arbitration to President Roosevelt.

The Czechoslovak government submits completely to such a course in advice.

## Directors Resign

Aircraft Company To Be Under Direction Of British Subjects

Montreal.—Two United States directors of Fairchild Aircraft Ltd., have resigned "so the company would be under the control of British subjects" in the event of contracts to build aeroplanes for the British air ministry at the company's Longueuil, Que., plant it was announced at the annual meeting. Sherman M. Fairchild and E. R. Robinson, both of New York, have withdrawn from the board. Phillip S. Gregory, Leo G. Ryan and W. Taylor Bailey, all of Montreal, were elected directors to replace the two New Yorkers and the late E. G. Jackson.

## Mediterranean Insurance Rate Up

Montreal.—Insurance men here said the war risk insurance rate on grain or package freight to French Mediterranean ports has been set at five per cent. of the invoice value, highest seen here since the Great War. Normal charge up to now has been between 2½ and three cents per \$100 of invoice value. Wheat cargoes reported no business on hand for shipment to the Mediterranean.

## Starts On Long Journey

Sydney, N.S.—Paul Melenick, 21-year-old Sydney resident who lost both legs five years ago when he fell under a moving train has set out on a hitch-hike about 1,200 miles to Toronto. He plans to obtain work in an artificial limb factory there, he said. Melenick "walks" with his hands.

CROSSFIELD, ALTA, THURSDAY, OCTOBER 6, 1938.

## The Shelter of Trees.

BY J. L. IRWIN

Stationary, Department of Lands and Mines, Government  
of the Province of Alberta.

Just what the value of a shelter-belt of trees can mean to either the farmer or market gardener in Alberta is most forcibly demonstrated by a visit to the grounds at Oliver just east of Edmonton.

These plantings were started in the autumn of 1930 and covered to begin with an area of 5 acres. Prior to this innovation constant wind-storms in the neighbourhood of this particular location had removed much of the top soil leaving an arid and barren tract of land whilst hundreds of tons of good soil lay useless by the sides of roads and fences waiting to be put back if a fertile area was to be created.

It was put back and wind-breaks of young trees were immediately planted to protect the area from further dangerous drifts. With care and expert attention growth was returned to what had been wilderness; the trees flourished and a garden of astonishing fertility has resulted.

Since that date hundreds of thousands of young trees of every variety have been sent out year by year to every part of the province by the Forestry Division of the Department of Lands and Mines.

The wind-breaks at Oliver represent many types of trees, the purpose of the Forest Service being to ascertain and demonstrate those most suitable for general use. The varieties include lodgepole pine, Siberian larch, Russian polar, caragana, jack-pine, Scotch pine, white spruce, Douglas fir and willows. Many others could be named.

To give an idea of the true value of a wind-break it might be stated that every foot in height of trees protects at least fifty feet of soil from dangerous or adverse winds which may cause soil to drift and growth to be retarded.

The shelter-belts grow remarkably quickly. At Oliver the lodgepole pine planted in 1932 is from 12 feet to 14 feet in height, the caragana planted in 1931, 12 feet and the Russian poplar planted in 1930, 32 feet. In a very short time after the planting of such shelter the danger of destructive winds is eliminated.

An example of the benefit of this protection was given one day when seeding was carried on without disturbance at Oliver during a wind velocity of 35 to 40 miles per hour. Outside such shelter this would have been impossible. A windstorm in June of this year reached a fury of 85 miles per hour but it left the sheltered ground at Oliver safe and intact.

As a result of wind-break protection a crop of vegetables was harvested this year by the end of July and reseeded with onions in August resulting in two crops for one season. Without a shelter-belt this could never have been accomplished.

The rapid and prolific growth of flowers vegetables and crops protected from prevailing and destructive winds, is nowhere more noticeable than at Oliver. A visit to this spot will demonstrate not only this fact but will show also how ground may be reclaimed by such a process and how it may be lucratively employed.

Nor is this all. Trees bring birds and birds, especially robins, keep the cutworms down. Song-birds, also, are always a much desired feature to a home.

Wind-breaks in addition to these great usefulness are also things of beauty with their ever-increasing foliage. Trees are the answer to many problems in Alberta as elsewhere. Their relationship to the success and happiness of home and community life is a very real one. So real that their protection and increased production should at all times be matters of first importance in the public life of the province.

17. A. D. Stevens

Generators at the Ghost River Plant—This is an important part of the extensive system which assures continuous service in over 150 communities throughout Alberta.

# ELECTRICITY

## BENEFITS EVERYONE!

WHETHER you live in town or in the country you benefit through today's wide use of electricity.

The new processes and manufacturing methods which electricity has made possible are responsible for most of the articles used in your home, your business, and on your farm.

Your radio, whether battery or batteryless, is of use only because electricity makes broadcasting possible. Your weekly movie is a child of electricity too.

You can phone for a doctor, or a pound of tea, only because of electricity. That same electricity has made it possible for your local merchants to keep their merchandizing methods up to the standard of city stores.

These are only a few of the many ways in which electricity benefits you, whether you live in an ALL-ELECTRIC HOME, or one that is still to be equipped with these time-saving and labor-saving devices.

THE GREATER THE USE OF ELECTRICITY,  
THE GREATER THE JOY OF LIVING.

### HOME CORNER.

Here is a toast that I want to drink  
To a fellow I'll never know;  
To the fellow who's going to take  
my place  
When it's time for me to go.  
I've wondered what kind of chap  
he'll be.  
And I've wished I could take his  
hand,  
Just to whisper, "I wish you well,  
old man."  
In a way he would understand.  
—Happy Time Memories

### HOME HELPS.

Fine leather shoes remain soft and shiny, when they are frequently rubbed with white of egg. The amount left in the shell after an egg has been used for cooking, is sufficient.

When a man uses brilliantine on his hair, his light-coloured felt hat soon shows a greasy mark around the crown. To prevent this, cut a strip of thick blotting paper, and place inside the leather lining; as soon as the blotting paper becomes soiled, it can be changed. The hat will last clean much longer.

When trousers are new, line the bottom half of the pockets with chamois leather, to prevent them wearing out with loose coins or keys.

Vinegar added to water, about one to three parts, will dissolve fly specks on glass or polished furniture.

### JOKES.

A modern Don Quixote, who after reading a number of knightly romances, conceived that it was his duty to inject some romance into life as it is lived now.

On a rainy, muggy day, he sallied forth to perform some knightly errand. He beheld a bewitching girl about to step from her car on to the dirty pavement. Hastening forward, he spread his coat under her dainty feet.

She looked at him in surprise. "Well, of all the darned fools!" she exclaimed.

And there was no Sancho Panza to console the Don.

## Production Stage Reached In Gold Mining Activities In Northwest Territories

Gold mining activities in the Canadian Northwest Territories have now reached the production stage, with the commencement of milling operations on the Consolidated Mining and Smelting Company's "Con" property in the Yellowknife area. The first gold brick, weighing 72½ pounds, was poured on September 5, and marked the start of actual gold production after more than three years of development and exploration work. According to the Mining Recorder of the Department of Mines and Resources, stationed at Fort Smith, N.W.T., the Yellowknife-Gordon Lake district continues to be the centre of great activity with several well-organized companies carrying out development work and numerous prospecting parties engaged in field work. Negus Mines Limited are erecting a mill on their property located a short distance from the "Con" mine, and Ora Plata, Chan Yellowknife, and others are actively engaged in the development of prospects in the same general vicinity. Approximately 4,000 claims have been staked in this region.

In the Great Bear Lake area, Eldorado Gold Mines Limited are treating about 85 tons of ore a day from which three to four grams of radium a month, as well as considerable amounts of silver and uranium products are being obtained. The high grade pitchblende ore and concentrates are shipped to the company's refinery at Port Hope, Ontario, for refining, while the silver concentrates are shipped to an American smelter. Recent improvements at the Eldorado mine include the extension of the power-house to provide for two additional 200 horsepower Diesel electric units, and the erection of a 70,000-gallon tank for oil storage. At the pitchblende-silver property of the Bear Exploration and Radium Company about 25 men are employed on surface work, general maintenance and freighting. During the month of August the mill at this mine operated 24 hours a day.

Prospecting and exploratory parties are continuing field work with several promising finds reported in areas to the north and east of Yellowknife. Many claims have been staked during the past few weeks as a result of new discoveries at Murray Lake, Macdonald Lake, Pensive Lake, Thompson Lake, Francois River, Turnback Lake, Beauville River and Sunset Lake.

Altogether a total of some 45 mining and exploration companies and syndicates are participating in the development of properties in the Great Slave-Great Bear Lakes mining field. Listed among these are Eldorado Gold Mines, Consolidated Mining and Smelting Company, Dome Mines Limited, Anglo-Huronian Ltd., Ventures Limited, International Mining Corporation, and several other well-known Canadian mining enterprises.

Officials of the Department of Mines and Resources just back from a tour of inspection of schools, hospitals, government offices and mining districts in the Northwest Territories while enthusiastic about the development which has taken place have repeated the warning issued some time ago by the Minister that there is no chance of employment unless arrangements are made in advance. The prospecting season is now drawing to a close and with the coming of winter construction and other outside work will be ended for this year. Men already under contract for the development work programs scheduled to proceed through the winter on widely separated properties will remain in the North, but many prospectors, miners and construction workers will soon return south to await the resumption of field activities next summer.

### Set Bad Example

Says Introduction Of Guns By White Men Caused Indian Troubles

The Indians never bothered much about large-scale massacres until they learned to handle white men's guns. Prof. T. F. McCreath said in a lecture to school teachers in the Royal Ontario Museum at Toronto.

The professor, an expert on Indian life, said it was "hardly fair" to blame the Indians for being war-like when actually he only learned the art after copying the white man and arming himself with the white man's guns.

The Indians believed the soul left the body through the mouth and that an Indian who died of strangulation would be cut off forever from the happy hunting grounds.

### The First Saxophone

Man Who Brought It To Canada Wishes He Hadn't

Swing orchestras and jam sessions just don't seem to fit in well with memories of concerts at the start of the present century, which may explain why the man who brought the first saxophone to Canada wishes he hadn't.

Edmond Hardy is nearing his 84th birthday now. He has retired from orchestra work, and lives quietly in his suburban Montreal South home.

"If I had known what they were going to do with it, I would never have introduced the saxophone to Canada," he avers with a bit of a shudder.

For 60 years after he had founded it Hardy led the Harmonie Montreal, a band that performed at all kinds of important functions not only in Quebec, but throughout eastern Canada and the United States. His little scrapbook is a chronology of social events for the half-century from 1874 onward.

He made his last appearance as a band leader five years ago when he led 195 musicians from his own band, and the bands of the Grenadier Guards, Victoria Rifles, Black Watch, Fusiliers Montreal Regiment and the Calixa Lavallée, composer of "O Canada."

To get back to that first saxophone: Hardy had it made to his order in France and brought it back to Canada. He was about to open a music business in Montreal at the time, and sold the instrument a short time later. He imported more and sold them, too, and soon built up quite an addition to his trade.

But he still wishes he hadn't.

### Probably Means More

Husbands Warned Against Cooking Dinner Once A Week

Possibly some husbands missed a recent news item stating that New York University is about to open a cooking course for men only. The conductor of that course, Miss Gladys Curry has for her slogan: "Every husband should cook dinner at least once a week."

"At least once a week" may be all right. But how long would it be before this meant Mondays, Wednesdays and Thursdays? Miss Curry's approach is diplomatic, but kind words butter no parsnips. She says that men have a "more scientific mind," more "natural mechanical ability" and "can turn out quite a palatable meal from a simple recipe."

Yes, indeed. And possibly they can wash the dishes better and scrub the floors more neatly.

Husbands who know their rights will be on guard. If a man wants to be a chef, let him. All the best cooks are men, anyway. But it is not right that a wife should say to her husband, "I wish you could learn to bake the kind of bread that Father used to make."—New York Times.

### Much Too Much

Cost For Government In Canada Runs Into Many Millions

Canada lays on the line no less a sum than \$122,000,000 in salaries for Dominion employees and pensions, \$77,000,000 in salaries and \$45,000,000 in pensions. There are 65,000 people drawing down the money, 43,000 distributed throughout the country. The figures come from the deputy minister of finance. On top of this federal outlay, there are the provincial and municipal overhead expenditures, all in the name of government. It is much too much.—St. Catharines Standard.

### Correct Measurements

Dr. Puffat, a prominent dentist in the west, received a letter the other day from a man in the next county which said: "I've heard tell of your skill as a dentist and I would like some of your teeth. As I am busy with my spring work I will give you the measurements. My mouth is three inches wide across, five-eighths of an inch thick the jaw, and some hummocky on the edges. Jaw is shaped like a hamsaw, with the toe forward. If you want me to be more particular, I will have to come there."

### Large Hangar For Toronto

John Schofield, chief architect of the Trans-Canada Air Lines, announced construction of a \$125,000 hangar for the air line at Malton airport, 10 miles northwest of Toronto, would start at once and be completed by Jan. 1.

### ROYAL FAMILY AT FAMOUS SCOTTISH MEET

The King and Queen with the two little Princesses in the Royal box watching the athletic events at the famous Braemar gathering.

### A Common Grievance

People Object To Half Introductions And Mumbled Names

At C. N. E. Press Day, I met a man who has a grievance, and he wanted me to voice it on this page, says J. C. Kirkwood, in Marketing.

I willingly do so, because it is a common grievance namely: men introducing a friend mumble his name. Now, most of us want to hear clearly the name of the person introduced, and likewise the man introduced wants his name articulated clearly.

Once I heard a 90-year old man dodge his obligation quite nicely. He was on the staff of Belfast City Hall. At a reception given by the Lord Mayor this ancient gentleman was supposed to introduce all arriving guests to the Lord Mayor. His way of doing his job was to turn to the guest, and say, "This is the Lord Mayor" and the Lord Mayor shook hands with several hundred unnamed persons. This same way of making introductions is used by a good many persons only half 90 years in point of age.

### Created His Own Job

Young Man Makes And Sells Transparent Covers For Books

A young man, alert to possibilities for earning extra money, has been successful in making and selling transparent covers for books and magazines. He uses a cellulose material which is inexpensive; cuts the covers to fit standard-size books and magazines, as well as the small, digest size; and binds the edges with heavy wire tape, which makes the covers long-wearing. These covers protect the books and magazines from dirt, soil, wear, weather, etc., and he sells many to libraries and bookshops, as well as from door to door. He has found something which meets his own needs as well as the needs of his customers.

Pangs of the rattlesnake lie backward until the mouth is opened.

### Rug Made Of Easy Crocheted Strip

PATTERN 6166

Here's a new wrinkle in the art of rug-making. A rug made in a continuous length—just short ends caught through with a crocheted hook—the strip then sewn together. The result is a rich design—a luxurious pile. Use handweaving, rag or yarn. Pattern 6166 contains instructions and charts for making rug; illustrations of it and of stitches; materials needed; color chart. To obtain this pattern send 20 cents in coin (stamp cannot be accepted) to Household Arts Dept., Winnipeg Newsprint Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## Farm Of The Future May Be Called Upon To Produce Many Things Besides Food

### Uniforms For Reporters

Frederick T. Birchall Describes Nürnberg In The New York Times

Even German newspaper reporters now wear a uniform, and a sad affair it is—a matter of brown shirt and tunic, black trousers and brown peaked cap, making the stout one look like Storm Troopers gone to seed, while the little ones resemble underdeveloped Boy Scouts promoted for diligence to the dignity of "long pants."

The Italian correspondents all wear Fascist uniforms when they must. They contrive to escape sometimes in the freedom of civil garb. Only the foreign correspondents from free countries retain liberty in the matter of attire, and they are tiny islets in the Brown and Black ocean.

The plight of their less fortunate brethren has produced among the British, French and Americans a reaction toward pullovers, slouch hats or no hat at all. Being hatless, even if not lacking nature's head covering, has its advantages because one does not have to watch out for the endless passing flags; one has nothing to remove. It is a great timesaver because the banner parts of the procession sometimes extend for a block or so.

All German diplomats are in uniform day and night. Theirs is black with silver buttons and with silver stripes down the trousers. High boots seem optional.

The dress uniform for evenings, however, is a stupendous affair, with tails, wider silver stripes, silver buttons, a high collar and a profusion of silver foliage—apparently tropical, since it corresponds to nothing in this climate—around the collar and lapels. Over all this is worn a long cloak with a silver spread-eagle below the shoulder.

Thus, although the German diplomat may seem a mere blood brother to an admiral in the daytime, after dinner no ball porter is any fashionable hotel anywhere is more respectfully caparisoned.

### Youth Training Program

Fifty Thousand Canadians Have Profited By The Plan

With particular emphasis on placement features, the Dominion-provincial youth training program for the present fiscal year is making excellent progress, the federal labor department said.

"While it is naturally too early to determine with accuracy the number of young Canadians who will benefit by the plan this year it is probable that last year's figures will be equalled if not exceeded," the department's statement said.

"Approximately 50,000 Canadians between the ages laid down in agreements with the provinces have profited by the program. The exact figures are: Men, 32,301; women, 23,156, or a total of 55,457. Last year the annual total by parliament was \$1,000,000. This year the Dominion's contribution is in the neighborhood of \$1,500,000. Provinces contribute on a 50-50 basis to the expenditure."

### Thatcher Wheat

New Rust-Resistant Wheat Makes A Good Showing This Year

Thatcher wheat in Western Canada suffered from leaf rust this year but "stood up first rate" as far as the more serious stem rust was concerned, Dr. L. H. Newman, Dominion cerealist, said.

"We have known for some time that Thatcher was susceptible to leaf rust and this year it came early and was severe," he said. "There was leaf rust damage to Thatcher in Manitoba particularly but even the damaged stands did infinitely better than the ordinary non-rust resistant varieties."

Dr. Newman stated Thatcher generally had made a good showing in Canada and experiments were continuing to eliminate the leaf rust.

When we see a meteorite, that appears to strike the earth, we know we must be at least 500 miles away, since it disappeared below our horizon while still high enough in the air to appear luminous.

Interviewer: "What have you to say to these anonymous letters?" Professor: "They're stupid! I read them but I never answer them."

England has a movement for abolishing dog licenses and taxing bicycles instead.

### Relics In Australia

A recent news item gives Mr. J. W. Paton of Montreal credit for saying that there are 3,800,000 milking cows in Canada and that there are 318,000 farmers engaged in this branch of agricultural activity. He also stressed the growing importance of the industry for supplying, in addition to the dairy products so well known, the raw material (casin) for synthetic wool. It is stated that there is a very thriving industry being developed in Holland, Italy, Czechoslovakia and Belgium for the manufacture of synthetic wool from casin and that it is bound to grow in other countries. The production at the present time is around 25,000 pounds a day.

On this side of the Atlantic we have not been forced to make so much use of synthetic products to replace declining supplies of natural products but it is safe to say that there will be more as time goes on. Milk powder, casin, many vegetable oils, soyas beans, wood, straw and cornstarch and many other vegetable products are already furnishing the materials for the manufacture of many useful articles of commerce. There is nothing about the modern motor car to indicate that soyas beans had any connection with its manufacture, yet Henry Ford uses thousands of them annually in the development of automobiles.

The farm of the future may produce many things besides food. As the natural resources of the lands are depleted, we shall have to turn more and more to the farm to supply the materials to provide clothing, shelter, motive power and countless other materials. Present estimates of the world's resources of oil indicate that the next quarter century will see them pretty well up. What then? Experiments are already shown that good motor fuel can be produced from materials easily grown on the farm.

Farms and farmers are very important factors in the well-being of the nations today. It is also indicated that this tendency will increase rather than decrease so it behooves the farmers to view their profession with this in mind. Present tendency of so many to disregard the effect of individual action upon the whole industry are to be lamented, especially when individual action destroys confidence in the products turned out.

Farmers, today, are somewhat at the mercy of better organized interests in that they have very little to say about many of the vital points concerning their business. The importance of farm products in the general scheme of things is reflected in the figures of trade and commerce, but the importance of the farmer is reflected in his own attitude toward his business. New uses will continually be found for farm products and producers will be on the alert for new outlets for their wares but whatever happens the collective relationship of the various members of the industry should not be lost sight of. If new branches of the farm industry are being developed, why not give them the kind of consideration that will insure rightful recognition? Should not farmers' organizations be prime movers in this direction to encourage new developments in the uses of their products?

### Relics In Australia

Discover Evidence Of A Former Higher Culture Than The Aborigines

Relics thought to be a link with a former race in Australia, of a higher culture than the aborigines, are reported to have been discovered in Queensland.

E. W. P. Chinnery, anthropologist with the northern territory survey party, has received evidence of the discovery in the shape of pestles and mortars among ancient pottery. Chinnery says when natives asked where the relics came from they said: "Something belongs man before."

If the relics are identical with those discovered in other places they may prove an important link with the supposed movements of early migrants between Asia and the Pacific, according to Chinnery, and indicate a line for further research into anthropological phenomena in Australia.

In New Guinea there are circles of standing stone, all of which belong to a great culture of the past. In some places mortars, the origin of which was unknown to the natives, are used as mirrors.

Turkey has abolished its consumption tax on medicines.

## MORE PHOTOS OF STAFF OF THE FLIN FLON MINE

ZINC PLANT OPERATORS AT FLIN FLON, MANITOBA

Over 100 in this group and they were nearly all born in Canada or the British Isles. From Manitoba 38, Saskatchewan 24, Ontario seven, Quebec five, New Brunswick and British Columbia one each, and seven from England, one each from Ireland and Scotland, the U.S.A. seven, and only 11 from all Europe. There are about 1,800 employees all told at Flin Flon.

MINERS OF THE DAY SHIFT AT FLIN FLON, MANITOBA

All in their working kits, with rubber coats, pants and heavy knee-length boots. On their heads the protecting helmet made of a light tough material and in front their acetylene lamps. One hundred and fifty men in this group and between this and the night shift they get out about 4,500 tons of ore daily at Flin Flon.

NIGHT SHIFT MINERS AT FLIN FLON, MANITOBA

There are 87 men in this group—too many to name individually, but it is interesting to note that 18 are from Manitoba, nine Saskatchewan, three Alberta, four Ontario, two Quebec, five England, four Scotland, two Ireland, and the balance from Poland, Czechoslovakia, Yugoslavia, Austria, Serbia, Roumania, Hungary, Lithuania, France, Sweden, Finland and only one from U.S.A. It takes all kinds of men to make a mine!

## WORLD HAPPENINGS BRIEFLY TOLD

Horatio Walker, distinguished Canadian painter and native of Listowel, Ont., died in his home at Island of Orleans, Quebec. He was 80.

Plans for a mass migration of 750 Mennonites from Mexico to Canada apparently have been abandoned, according to immigration department officials at Ottawa.

H.M.C.S. Nootka slid into the water at Victoria, alongside the Esquimalt plant of Yarrow, Limited, and was fourth Canadian naval vessel to be launched this year.

Approximately 50,000,000 feet of Maine timberland fell before the onslaught of the recent hurricane, Forest Commissioner Waldo N. Seavey estimated.

Continued increase in savings accounts and an increase in deposits with the Bank of Canada featured the Aug. 31 report of chartered banks to the finance department.

More emphasis on youth programs was urged before the general council of the United Church of Canada by Judge F. A. E. Hamilton of the Winnipeg juvenile court.

Drilling of a deep-test well in the Lloydminster gas and oil field will be started shortly, it was announced. The well will be drilled by a concern to be known as "Lloydminster Royalties."

A gold medal presented to John Bright, British reformer, by the Birmingham Liberal Association in 1883 is missing from its case in Rochdale Art Gallery, the lock having been forced and a gilt replica left as substitute for the gold.

## A German Name

Local consulates seem not to be sure whether the word "Sudetens" is German or not. Irrespective of its origin, however, says the Toronto Star, it is (Lippincott's Gazetteer) the German name for the Sudetic mountains, and hence transferred to their inhabitants. The Sudetic range, or Sudetas, were known to the ancients as the Sudeti Montes.

Money is no homing pigeon: when it flies away it doesn't come back to roost.

## Information For The Future

Scientists To Leave Instructions In 800-Pound Metal Letter

Five thousand years from now historians will receive an 800-pound metal letter, a "time capsule" containing information about the present age. It will be deposited 50 feet below the surface of the New York World's Fair grounds. And if future historians find the capsule, major credit will go to a Canadian geophysicist, Sherwin Kelly, former professor of geology and mineralogy at the University of Toronto.

Mr. Kelly, an expert in electrical prospecting, will direct future historians to the cache of the capsule in a book of record which will be preserved in libraries, museums and depositories throughout the world. The message in the book of record will tell how the capsule can be located, using present-day electrical prospecting methods.

The "time capsule" will also contain statements of this age's scientific, engineering, industrial, social, religious and philosophical achievements. Motion pictures will show how we look, act, talk, and what hats the ladies wear.

## Reflects Public Opinion

No Government Can Change Unless Majority Of People Do

Government reflects public opinion. If you want a different kind of government, you must change public opinion. The individuals who make up governments—local, state and national, know a great deal about public opinion because that is the most potent force in their careers, and over a period of time they become past masters in forming public opinion, first, because they have barometers in very frequent elections, and second, the very offices with which the people endow them give them standing in the court of public opinion.—Public Relations, New York.

Wheat fed, or to be fed, to livestock and poultry in Canada during the 1937-38 crop season has been estimated preliminarily as 18,938,000 bushels, as compared with 15,794,000 bushels in the 1936-37 season.

Time flies, so don't put quicksand in the hour-glass.

## Good Little Chinese

Children In New York's Chinatown Never Get Into Trouble

It has taken the New York authorities concerned some years to enlighten others regarding the exemplary conduct of local Chinese children. However the information is no less interesting than it would have been if supplied earlier.

The organization which revealed to the world the unusually fine innate qualities of the little Chinese children, the slightly cumbersome title of the Joint Legislative Committee on Children's Court Jurisdiction and Juvenile Delinquency. The J.L.C.C.-J.D. is authority for the statement that among the 3,000 children in New York's Chinatown there has been only one case of juvenile delinquency in the past eight years.

The investigators went further and asked Chinese parents to what they attributed this record. The answer was as follows: 1. Among the young the most severe punishment is to "lose face". 2. The child is taught reverence for his parents.

To-day more rice is eaten in the world than any other food.

## No Puzzle For Him

Schoolboy Had Reason To Think He Knew Inspectors Age

An inspector of schools, determined to puzzle a class of boys, asked them this question in mental arithmetic: "If I had a field 100 yards long by 80 yards wide, and I employed three men for five days to plant it with seed potatoes at a guinea a hundredweight, how old am I?" The class was not unnaturally baffled, all except one boy who immediately raised his hand.

"Well?" asked the inspector slightly taken aback to find his challenge accepted.

"Forty-four," said the boy.

"How do you make that out?" demanded the inspector.

"Well," said the boy, "I have a brother who is 22 and he's half-daft."

Sir Walter Raleigh grew Ireland's very first potato in a garden, still in existence, located at Youghal, 30 miles from Cork.

Adeline Patti, often referred to as the highest paid prima donna on the operatic stage, earned \$5,000,000 in her lifetime.

## FAMOUS FRENCH BOXER IN NEW ROLE

Georges Carpentier, foremost in the ranks of contenders for the world's heavyweight pugilist honors of yesteryear, shown at Stoke Poges, England, with his daughter, Miss Jacqueline, who competed in the Girls' Open Golf Championship. "Gorgeous Georges" is still as dapper as in his fighting days.

## SUNDAY SCHOOL LESSON

OCTOBER 9

## SPIRITUAL WORSHIP

Golden text: God is a Spirit; and they that worship him must worship in spirit and truth. John 4:24. Lesson: Exodus 20:4-6; 32:1-8; John 4:19-24. Devotional reading: Psalm 100.

## Explanations And Comments

The Second Commandment: Worship God Spiritually, Exodus 20:4-6. The second commandment forbids image worship, the making as an object of worship of any graven image or likeness of anything that is in heaven above, or that is in the earth beneath, or that is in the water under the earth. The earth was thought of as flat and resting upon a huge abyss of water. Fish were worshipped in Syria, Assyria, and Egypt. God must not be worshipped under false forms.

Thou shalt not bow down thyself unto them, nor serve them: for I, Jehovah thy God, am a jealous God—jealous of my honor, of the use of images which turn the worshipper's mind away from me while they represent me. Visiting the iniquity of the fathers upon the children, upon the third and upon the fourth generation of them that hate me. Proof of this inheritance is only too common in the craving for alcoholic drink inherited by descendants of drunkards, in the degenerated and feeble-minded who are the children of drinkers, and in the wretched ill which sometimes befall even the children of moderate drinkers. "And showing lovingkindness unto thousands of them that love me and keep my commandments." The marginal rendering of the Bible is "thousands of generations"—a figure of speech which shows how infinitely greater is divine mercy than divine wrath.

No one can live without an object of worship. If we do not worship the true God, we worship something in his place. Somewhere in our hearts there is a shrine that we have made our own. "Christian idolatry" is less crude than heathen idolatry, but it is essentially the same—God is de-throned, some object is put in his rightful place.

"The hour cometh and now is," Jesus continued, "when the true worshippers shall worship the Father in spirit and truth; for such doth the Father seek to be his worshippers."

Rouget de Lisle, French royalist, wrote the "Marseillaise," only to hear it as the battle hymn of the opposing revolutionist army.

Three astronomers at Yerkes Observatory, at Williams Bay, Wis., have discovered a star 3,000 times larger in diameter than our sun.

## This Fog Was Costly

Tied Up Liner Queen Mary For 12 Hours At New York

The New York Post says no fog was dense enough to subdue the glitter that tied up the Queen Mary for 12 hours recently on the very entrance to New York. She was bright with the gleam of gold and silver in the amount of \$45,152,000; \$45,000,000 was in gold, \$152,000 was in silver.

If there is any question in your mind that the fog doesn't run into money, consider that the Cunard White Star Line had to pay overtime to the customs inspectors and that the extra food bill, according to Chief Steward E. B. Finby, amounted to \$4,000!

The liner did not expect to serve breakfast as the Queen Mary was scheduled to dock so early; so first breakfast had to be served; then the boat was really trapped and luncheon was served and before the fog and tide came to terms, dinner was served.

All in all, 2,000 meals were served instead of 90.

"In China a man doesn't know his wife until after he has married her." "Why mention China particularly?"

If a battery is fully charged there is no danger of its freeing.

## POOR MAN'S GOLD

### Courtney Ryley Cooper

© Courtney Ryley Cooper.  
WSU Service.

#### CHAPTER IV.—Continued

"Of course." The Seattle girl extended her hand, a long-armed gesture—Jeanne Towers accepted it, hesitantly. They smiled and exchanged greetings; suddenly Jack felt ill at ease and wondered why Jeanne Towers should be apologizing for her appearance. After all, they were the clothes she always wore. As for Kay, she had said nothing but pleasant things, some way, seemed unpleasant. Jack Hammond could not understand it. He hurried to the other introductions. Then: "Won't you join us?" he asked. Jeanne drew back.

"No—no, thanks," she evaded. "I'm just going to have a bite. I've got to get back to the store." Jeanne sought the farthest corner. A Chinese waiter approached, rubbing his hands on a dirty apron. "Glazing fish, lamb chops, deer steak, bison steak," he announced. "Lay off the bear steak," Bruce Kenning warned. "It's tougher than old shoes."

"And don't ask about the vegetables," Hammond interjected. "They're all desiccated and—" "Taste awful," announced Timmy. "I want venison." "Let's all have venison," Kay suggested, and with the order given, leaned back on the bench, her hands behind her. "The idea of being snooty about a venison steak."

"What I'd like right now," said Timmy Moon, "is a juicy grubstake, so I could buy another plane and make a lot of money out of flying supplies into this country." Kay frowned at a hand. "I'll grubstake you," she said, "as soon as I make my first million." Then she half turned, at a nudge from Mrs. Joyce. Her eyes swept the restaurant, pausing at intervals in a state of appraisal. Hammond followed her gaze, knowing at what she looked and wondering as to the result. Around the World Annie, accompanied by some of her girls, missed the last of her meal at a nearby table. Kay appraised them all. Her full lips broke into the merest suggestion of a cynical smile. Then she said in a low tone to her mother, "Quite interesting, isn't it?"

Hammond did not catch the remark. He only noticed that Kay loved her eyes, she had looked toward the corner where Jeanne Towers sat. It made him want to explain; he remained silent, however, some way thankful that he had not told Kay it was Jeanne who had procured the woman to do the housework at the cabin. Suddenly he felt weak. Around the World Annie had risen, dusted the crumbs off her elegant lap, and was heading straight for his table.

Again Hammond noticed that Mrs. Joyce nudged her daughter, again Kay looked up, then turned to animated conversation with Bruce Kenning. Around the World Annie came onward. Somewhat awkwardly Hammond got to his feet.

"Never mind that stuff," the dance-hall proprietor exclaimed. "I don't want to butt in. I wanted to know where I could find the pilot of that airplane."

Timmy Moon grinned. "I'm it."

Around the World Annie raised her diamond-sparked hand to her bleached hair.

"I know now ain't no time to talk about it," she said, "you at dinner and everything. I just wanted to

stick my ear in first. I got a lot of work for you—a guy will see you after while." Then, somewhat flustered by contact with hostile femininity, she walked on.

Jack Hammond laughed uneasily and wiped a hand across his damp forehead.

"Well, I'll say this," he sighed, "you're getting everything, all in one dose."

"What's her name?" asked Timmy Moon.

"Around the World Annie," Bruce Kenning volunteered. "She's putting up a big dance hall over on the Alaskan side of the line. Ham's gotten it finished yet; that's why they're all eating over here."

"We would run into that bunch tonight," said Jack in wholehearted discomfort. "I'd hoped to ease Kay into all this stuff rather gradually."

"Oh, don't be silly," the girl said. Hammond beamed.

"You'll do, all right?"

"Of course she'll do," Mrs. Joyce reached for her green holder. "Kay's no prude!"

"Certainly not. Besides, I think all this is simply gorgeous. Then, when I've found my claim and filed it or whatever you do—"

"As if you'd have to hunt a claim," Timmy broke in. "Jack wrote you he'd laid aside one for you."

"Is it rich?" the girl asked. "With gold nuggets sticking out everywhere?"

Hammond fenced laughingly. "Well, I can't say that. None of them are really rich. My partner was saying to-day that we'd do well if we got fifty thousand out of our first claims."

Kay gasped. "Only fifty thousand?"

"That's just one claim," Kenning interrupted. "Wait until they get into the real stuff."

"Where is it?" Mrs. Joyce had become interested. Hammond shrugged his shoulders.

"What we knew. We've an idea but—"

"What you need," Kay interrupted, "is a good geologist to help you find it. That's what Father always said—never go into a mining deal without having a geologist to tell you where to go."

Hammond toyed with his tiny fork.

"I wish we could do a little consulting," he said seriously.

"Well," Kay flipped her hand toward Kenning. "Here's your consultant."

Kenning laughed and called for her to soft pedal the press-agency. Hammond remained serious.

"My partner's one of these old-fashioned fellows who doesn't believe in science."

"McKenzie Joe, you know," Kenning supplied. "Been up in this country most of his life."

"That's about the people get queer—staying away from civilization all the time?" Kay asked.

"Bushed," he said. "Hammond explained."

"Well, it amounts to the same thing," she laughed. "I know what I'd do if I needed advice. I just wouldn't say anything to him about it."

Kenning covered the situation with a laugh.

"That's a woman's viewpoint for you."

"Women are right sometimes," Mrs. Joyce added. Timmy fussed with his knife and fork.

"What that Yellow Peril would bring on the steak. I'm going to eat the tablecloth in a minute."

"It'll be along," Hammond answered, glad of the change of conversation. "I'll try to get hold of that Chinaman."

He raised his head, looking about the shoddy restaurant, only to pause as the door opened and a young man entered, paused a moment, then started forward at the sight of Hammond's party. He was a man Jack had not seen before, once well built, but now somewhat fallen away, as though his clothing did not fit, or as if inactive life had robbed a frame once well filled by the outdoors. The argentine extended to his features, deep lines about his mouth, a thickness of the cheeks at each side of his nose. He raised a cigarette to his lips with a jerky movement, then snapped the arm quickly down at his side. Now he hesitated, as if wondering whether or not to interrupt. At last he decided against further

approach and turned again to the door. Hammond saw him glance toward the corner where Jeanne Towers sat and stiffen as though with surprise. Then he heard a sound from the corner, half gasp, half scream, that was smothered almost before it began. For an instant the two stared, as if each were petrified by the other's presence. Then the young man swung out the door, and Jeanne Towers, fighting mightily to pretend unconcern, returned to her meager meal.

#### CHAPTER V.

An hour later, Hammond saw the man again. The meal was finished and Jack was strolling through the camp with his guests; Kay had announced a tremendous interest in everything about her; she could not wait until morning, she said.

So now, picking their way along the dark passageways and trails which passed as streets, Hammond had done his best to give a picture of the place, its beginnings, its hopes.

At last, tired, they had turned home. But ward, Timmy Moon lagging somewhat in the rear. Glancing back, Hammond saw the dim form of a man follow the aviator for a few moments, at last halting him. Timmy was late reaching the cottage.

"Where've you been?" asked Kay. The pilot grinned.

"A fellow wanted me to make a trip for him."

"That man who came into the Stumgullion?" Hammond asked. Timmy nodded. Kay Joyce shrugged her shoulders.

"How far is it from here to Wrangell?" asked Timmy.

"To where?" Kay was yawning.

"Wrangell, Alaska," Jack supplied. "It's about a hundred miles air line."

"That's okay," said Timmy. "Fifty cents a mile, a hundred bucks for the round trip. Say," he queried, "there's a part of this lake that dips over on the Alaskan side of the line, isn't there?"

"Mind pointing it out to me?" "Sure," said Hammond.

"Sure. I'll be making an early get-away in the morning. Let's go outside."

"Well," said Kay, with another yawn, "if there's anything to see, let's take a look at it. Come on, Mother."

Mrs. Joyce laid aside her green cigarette holder and with that queer, coldly acquiescent mood—which seemed a part of her, joined the rest of the group on the tiny verandah. The moon had risen shimmering in the great expanse of Sapphire lake, lying now like an irregular plate of silver between rugged mounds of black velvet.

"It's an inlet, over there to the right," Hammond said. "Land on that and you'll be safe."

"Safe?" broke in Kay, with a little laugh. "From whom?"

"The Mounties. This is a booze trip, isn't it?"

Kay faced the aviator. "Timmy! You haven't gone in for bootlegging already?"

The tone was jesting, but Timmy was tired.

"It's against the law to bring liquor from American territory to American territory. I'm not sneaking anything into Canada."

"Who's this fellow who hired you?" Hammond asked. Curiously, pulled hard at him; he was sure it was the man who had frightened Jeanne Towers. Timmy rubbed his hands together.

"Damned if I know. He said his name was Lew Snade. I think he works for Around the World Annie."

Kay laughed, somewhat harshly. "So that's what becomes of our darling Timmy. He comes into the new, unfettered North and immediately becomes a bootlegger."

"It was badly timed. Timmy Moon's nerves were raw, from a long session at the stick."

"Well, at least I'm honest about it. I'm not being a damned pretender!"

"Why, Timmy," asked Kay, with an air of amazement. "Who's kidding?"

"We've all been pretending," said Timmy Moon. Jack caught the scent of liquor on his breath; and evidently Lew Snade, whoever he was, had been generous. "And I'm sick of it. We're up here and let's be honest as to why we're here."

"Timmy!" in the reflected light of the doorway, Hammond saw that the girl's face had gone white; there was rage in her eyes. The aviator did not notice.

"Don't Timmy me!" he exclaimed. "We're all broke and we might as well say we're broke and be done with it!"

"Perhaps you'd better go to bed," Mrs. Joyce icily.

"I think that's a good idea," Hammond took to his arm. "Time for us to go, Timmy."

"Oh, all right." The round little pilot was grinning again. "I didn't

## \$200 For Any Old Lamp or Lantern!

Your Coleman Dealer pays TWO DOLLARS for any old lamp or lantern when you send it in on a new Coleman. This means you get \$200 (plus extra) big saving on Coleman Lanterns, too! See your Coleman Dealer. Trade today!

mean to start any fireworks." Hammond pulled him off the verandah and with an effort at a joking good-night to the two women, led him down the trail.

"Borry I can't put you up in my cabin," he apologized, when they were well along toward town. "But we've only got two bunks there."

"Oh, I couldn't go, anyway. I've got to get out too early." Timmy rubbed his hands over his face.

"Wow, how a couple of shots can hit a fellow when he's tired."

"You rather spoke out of turn up there at the house," the miner suggested.

Timmy raised his head, pulling hard for him.

"Oh, I guess I did," he confessed. "Kay will hate me for that. They've been trying to keep it dark that they haven't got a cent. But everybody in Seattle knows it. If it wasn't for the money that Bruce has, they'd all starve."

Hammond gasped. "But they've always been the rich people of Seattle!"

"They're always been the rich people with their heads in the air. But they can't hold 'em any longer down there—that's why they were so glad to get out."

A certain grin came into Hammond's features.

"Kay doesn't need to worry."

"Then let's drop the subject," the miner said quietly. "Besides, here's your flop gun."

Timmy Moon hiccupped.

"Kay's excited, looking at the outlines of the log-cabin behind, with its bear-tail candle flickering behind a mosquito-net window."

Hammond slapped him on the shoulder.

"Get to bed, Timmy!" he commanded. "You've had a long day."

Then, lonely, puzzled, a bit depressed, he went onward toward his dark cabin where moon McKenzie Joe. This night of nights had not turned out at all the way he had hoped for it.

Morning, however, brought a spirit of gaiety; everybody had been tired as he began what was meant to be a sprightly conversation about McKenzie Joe's guests. Then she turned to the subject of Timmy Moon's air-plane.

"She's changed the whole camp!" she exclaimed, rearranging a few containers of dried food on the almost empty shelves. "Everybody's been asking me when I intended to lay in new stock."

"Buy me some tobacco that isn't half hay when you do," Hammond ordered, with a grin. "That's McKenzie Joe's been using—he could smoke moose hide."

Jeanne got out a pencil and a sheet of paper; already there was the beginning of quite a list.

"I can't get it for a week or so," she said. "Mr. Moon is booked up until I was up early—but the Stumgullion people want the dog house and the hotel were already ahead of me."

"What's a week?" asked Hammond. "You'll be the merchant queen of Sapphire lake first—thing we know."

"I'm afraid I'm getting as bad as my prospects," came with an uneasy laugh. "I've been wishing for another mining rush."

"Why?"

"Oh, I don't know—the excitement, I guess, the thrill of going

somewhere." Then, "I'm sorry. That doesn't sound grateful."

"But this camp hasn't really gotten started. Quickly he asked, "Jeanne, what's bothering you?"

"Spring, maybe."

"Sure?"

"She fenced. 'What else?' " "Who was that man in the restaurant last night?"

"Oh, that," she exclaimed, with a smile that for the moment dimmed her eyes. "It was all too silly. I could have sworn I knew him—a boy I'd gone to school with up in—Ibuck—come!"

"It was a mistake then?"

"Oh, yes. I'd looked up hurriedly—it was just like seeing a ghost. Did you hear me? I almost shrieked. The poor fellow must have thought I'd gone crazy. I did feel like an idiot."

Hammond agreed that it was indeed a silly feeling. Sooth he went onward, anxious to take the trail up to the cottage. But he carried with him an uneasy premonition that Jeanne Towers had not told the truth.

Kay was waiting for him, as well groomed as if she had come from a beauty parlor. Hammond watched the sun play on her hairless head, and with her mother, they went down the trail. Then at last, on the banks of Look creek, the man pointed out the claim which he had saved for her, a stretch of gravel extending along the stream near where upturned stones and earth told of the workings held by McKenzie Joe and himself.

"I got them as near mine as I could," he announced.

"And this is a claim?" asked Kay. "Why, it's just the bank of the stream!"

"Look!" Hammond answered. All along the creek were evidences of labor. Here and there, disregarding the high water, men labored at the shoveling of earth into long, wooden sluice boxes which, picking up the water from a flume running from a higher point in the stream, carried it down on a slow decline.

"You just wash it through and it becomes gold," Kay said curiously. "Is that what it is?"

"It looks like a day laborer's job to me," her mother reflected.

A shout answered her, from upstream, where the law-boned Olson and two partners were working. Instantly labor stopped elsewhere. Necks craned. Heads appeared above the higher portions of earth, where the stream temporarily ran between cut banks. Then men began to converge upon the sluice box.

"Let's go up!" Hammond exclaimed. "Olson's found something in the clean-up."

"The clean-up?" Kay asked, hurrying back. Mrs. Joyce followed, following somewhat in their wake, glancing acridly about her, a woman who seldom smiled, who seldom gave interest, yet who seemed always to be weighing everything within her range. Hammond turned to explain.

"Yes, the clean-up. You see, those long wooden chutes are called sluice boxes. They've got cleats across the bottom, called riffles. The dirt is shoveled in at the top and is carried along by the water. The dirt and light gravel flow on out. Anything heavier settles behind those riffles."

"Oh, I see. Then you stop shoveling and pick up the gold?"

"Not that easy. It takes a long time for those riffles to fill up. Then everything they've caught is scraped out. After that the miners pan it."

"Pan it?"

"Yes—there's one. He pointed to a discarded gold pan on the creek's bank, flat bottomed and with sharply sloping sides. "They put the scrapings in there and drip water into it, swirling it around. It takes a long time to get rid of everything but the nuggets."

"Oh, I'd love to see a nugget again. Like those you gave me in Seattle."

Hammond laughed.

"It looks like you'll get your wish. Olson's pretty excited."

(To Be Continued)

#### Claims World's Record

Australian Farmer Sows 920 Acres Of Wheat In 120 Hours

An Australian farmer in Victoria has just sown 920 acres of wheat in 120 hours, which he claims to be a world record. For six days he worked night and day with a tractor, travelling seven or eight miles an hour. Four men worked the tractor in six-hour shifts.

Freezes Whyn' Touched

Pure water, standing quietly in a laboratory doesn't always freeze at the freezing point of 32 degrees. Indeed, in such circumstances, pure water has been known to remain liquid until the temperature went down to zero. But the instant the water's touched, it turns to ice.

In Kenya, wild animal shooting is carefully regulated.

The royal mint of Great Britain makes for it Europe, with the exception of France and Germany.

## COMFORT! CONVENIENCE! SAFETY! with a JOHNSON CHORE HORSE

## Brilliant Electric Light Constant Dependable Power

HOW! at low cost (as low as \$69.50), with a new Johnson Chore-Horse, you get the comfort and convenience of electric light and power at the turn of a button. Flood your home, bush or yard with brilliant electric light and generate ample power for the hundred and one conveniences you have always wanted, such as radio, charging batteries, water pumping, vacuum cleaners, washing machine, electric iron, milkster, etc. Where ever you live, regardless of location, wind and weather, a Johnson Chore-Horse will modernize your home with electricity and at a cost easily within reach of every rural home. No installation trouble—no expensive wiring—always ready for use—designed for long life. Complete details are available in a full range of capacity from 150 to 400 watts and include engineering advancement exclusive to Johnson. Precision-built manufacturing guarantees trouble-free operation, while sturdy construction insures years of satisfactory service under several conditions. Whether your particular requirements call for 150 or 400 watt units, the super-power 400 watt 32 volt model, you'll find a Johnson Chore-Horse, modestly priced, that will serve your requirements best. Write today for free folder, complete information, and investigate, fully, every advantage offered by the Johnson Chore-Horse.

As Low As \$69.50 Taxes included J.B. Plant, Peterboro.

The Hoarding Habit

Hanging On To Articles That Might Be Useful Some Day

Most of us have the hoarding habit—a relic of the days when materials were scarce, articles had to be laboriously made by hand, and factory work and transportation were less developed. Haunted by the fear that we may need it some time, we hang on to the old picture frame, the shabby chair, the rickety chair, the nicked dish, the rusty pan and the faded dress.

Dresser drawers, cupboards, book cases, closet, cellar and attic are crowded with possessions which have outlived their usefulness—for our household. Possibly passed on to another home, in a different situation, they might be useful again.

This is the proper time to go over every nook and cranny of the house and sort out these "impediments," as the Romans called the stuff with which they encumbered themselves. Become stony hearted, diamonds sentimental, consider hygiene, philanthropy and room order and make a clearing of many things which clutter your house.

Thousands Is His Aim

Sixty-year-old Edward Howard of Philadelphia, who hopes to give 1,000 free blood transfusions before he dies, has already given his 882nd.

A blood donor for 15 years, Howard boasts he can drive a tempenny nail into an oak plank with his hat and pull it out with his teeth.

Man has learned more about the earth on which he lives by studying the stars than by studying the earth itself.

As a token of mourning when their favorite cat died, ancient Egyptians shaved off their eyebrows.

The royal mint of Great Britain makes for it Europe, with the exception of France and Germany.
